

Level-3 Purchase Card Data

Level-1 card data is typically associated with consumer transactions and limited purchase data returned to the cardholder. Level-2 data elements benefit the corporate/government/industrial buyer and can often be transmitted via a standard credit card point of sale terminal due to their restricted capabilities.

Level-3 (also known as Level III) line item detail, which is equivalent to the information found on an itemized invoice, requires greater system capability which is provided through 3Delta Systems' payment applications.

The following example illustrates the difference in the elements that make up each data Level.

Typical Card Data Elements / Capabilities per Level			
Data Type	Level-1	Level-2	Level-3
Merchant Name	✓	✓	✓
Transaction Amount (Total)	✓	✓	✓
Date	✓	✓	✓
Tax Amount		✓	✓
Customer Code (16 Char)		✓	✓
Merchant Postal Code		✓	✓
Tax Identification		✓	✓
Merchant Minority Code		✓	✓
Merchant State Code		✓	✓
Ship from Postal Code			✓
Destination Postal Code			✓
Item Product Code			✓
